

ark wire/shelf kit

user instructions

Attach both stabilising feet to the joining bar
Insert the joining bar into the groove
on each foot and tighten both screws

Clip the top of the shelf to the frame
sides and then tighten the shelf hanger
to both vertical wires

Assemble and insert both tension rods
into the stabilising feet holes

Connect the 2 graphic hangers to the
vertical wires and space them apart
ready to accept the graphic

Insert both tension poles into the top rail
't' connectors and connect the vertical wires

Locate the bottom rail onto the
2 hooks on the stabilising feet and connect
the 2 vertical wires to pull the frame into tension

Finally loop the graphic around the
hanging poles and fasten at the rear
