

3D Centre Display Tunnel

Artwork set up:

We cannot take responsibility for printing errors resulting from artworks supplied which do not meet our specifications. Please make sure your artwork meets OUR specification. This will ensure your product is delivered as you wish it to be and on time!

Please supply files set up in Quark, Illustrator or InDesign. All images and logos to be CMYK and a minimum of 100dpi at final print dimensions. We print CMYK. Files supplied in RGB will create colour problems at print stage as these will be automatically converted to CMYK. Colours will change! We do not accept "raw" Photoshop files. With Quark remember to "collect for output" to include all fonts. **Please call us if anything is unclear.**
